TECHNICAL SKILLS

Frontend 1+ years

React.js, Next.js, React Native, TypeScript, Expo, Tailwind CSS, Shadcn UI, Micro Frontend, i18n, and IConsax React.
State Management: Redux Toolkit, Zustand.
Data Fetching: TanStack Query.

Tools & Collaboration 1+ years

Git, GitLab, Figma, Postman and Ubuntu.

AI-assisted Development & Productivity 1+ years

Claude AI, ChatGPT, Cursor AI, and OpenAI Codex for code generation, debugging, refactoring, documentation, testing support, and developer productivity optimization.

SOFT SKILLS

Communication and teamwork.
Critical thinking, problem-solving.
Organization and time management.
Fast learner and adaptable to new technologies.

WORK EXPERIENCE

1/2026 - now

FrontEnd Developer Intern

VPPOS Technology Joint Stock Company

As a member of the frontend development team, I participated in developing ERP Human Resources and BOS - VPPOS systems. I was responsible for building responsive user interfaces, integrating RESTful APIs, and implementing reusable components for internal business workflows and HR management features.

9/2025-
3/2026

AI Research Student

ETECHS Lab

Role: Full-stack Developer and Researcher.

Developed a student activity monitoring system using Python, FastAPI, PostgreSQL, MongoDB, Neo4j, and YOLOv12. Built AI based activity detection and backend services for managing student and activity data. Contributed to scalable system architecture, API design, and maintainable project structure for future expansion.

EDUCATION

2022 - 2026

Bachelor Degree of Information Technology

University of Education

Frontend Developer with experience in building responsive and scalable web applications using React, Next.js, and TypeScript. Skilled in modern frontend architecture, state management, API integration, and performance optimization. Passionate about creating intuitive user experiences and writing clean, maintainable code.

PROJECTS

3/2026 - now

ERP Human Resources

VPPOS Technology Joint Stock Company

Developed frontend features for an enterprise HR management system handling rewards & discipline, training, leave management, and onboarding/offboarding processes using React, Vite, Microfrontend architecture, Zustand, TanStack Query, Shadcn UI and Tailwind CSS. Implemented reusable UI components, form validation, internationalization (i18n), and RESTful API integration with the company design system. Contributed to improving user experience, maintainability, and scalable front-end architecture.

1/2026-
3/2026

BOS - VPPOS

VPPOS Technology Joint Stock Company

Developed frontend features for an internal business operation system supporting promotion management, marketing campaigns, and logistics workflows using React, Vite, Microfrontend architecture, Redux Toolkit, Tailwind CSS, and RESTful API integration. Contributed to the Promotion & Marketing and Delivery Management modules by building responsive UI components and managing application state with the company design system. Helped improve workflow efficiency, maintainability, and scalable front-end structure.
